

# Digital CSU

---

What: **Digital CSU workshop on reference/citation managers**

When: **Thursday, February 23**

Where: **MC 420**

Dear Colleagues,

You are invited to the next Digital CSU workshop from 11:30 am to 1 pm on Feb. 23 in MC 420, the new digital media room, to learn and share your knowledge about **Zotero** and **RefWorks**

These free software packages are two of the most popular citation managers used by academics. Librarian Amanda Goodsett will present an introduction to using Zotero and RefWorks, but we invite everyone to come share their knowledge, practices, and techniques, for using these tools or others to gather references, manage citations, take notes, create bibliographies.

And please inform your students. I brought a class to the Digital CSU digital drop-in last month to learn about Zotero. The typical responses from the students were "This is life-changing" and "Why didn't somebody tell us about this when we were freshmen?" So please tell your students to come discover some digital tools that will help them with citations and bibliographies.

Rob Shelton  
Co-converner, Digital CSU
