The Essential Gospel Music Listening Library Edited and with an Introduction by Stephanie L. Barbee

Compiled by the Members of Spiritual Gifts,
A Professional Black Sacred Music Repertory Ensemble (2009)

Both students and scholars at the university level can benefit from using a catalog of African American sacred music, because, in African American communities, music often serves as a diagram, tracing the growth and stagnations of African Americans throughout their history in the United States. Gospel music, for example, developed through racism, segregation, and other forms of humiliation. In 2005, author Bill Carpenter said Gospel music has served as an outlet for frustration and brought peace to believers in Gospel music. Gospel music also provided an avenue to business ownership, as many Black-owned record labels started as Gospel record labels. This is a significant point, since many record labels that held copyrights to Gospel music were owned by non-blacks, who, while they did not necessarily understand Gospel music, recognized its importance in the African American community.

In completing this particular collection, identifying the release date and respective record label was very time consuming, especially for songs released in the early twentieth century, the era of traditional Gospel music. Recordings of Mahalia Jackson's music, for example, are often re-mastered to provide better sound quality, and the release date for the re-mastered work is more readily available than the date for the original recording. The Grace Note Music Database proved to be an excellent source of information, yielding more data than many music retailer websites.

Each catalog entry provides information on the evolving business of Gospel music, and the recordings themselves serve as exemplary teaching tools at the post-secondary level. Gospel music has endured the test of time, it is vital to the lives and cultures of African Americans, and the music's influence will continue for years to come.
