February 10, 2011

# Introduction

- This report analyzes the technology-based economy of Northeast Ohio (NEO). It was prepared for NorTech by the Center for Economic Development at Cleveland State University's Levin College of Urban Affairs. This is an update of four previous reports that examined the high-tech sector in Northeast Ohio.
- This study shows trends of NEO's technology-based economic sector and compares it to the same sectors in the remainder of Ohio, remainder of the Midwest, and the United States.
- This study analyzes the technology-based sector of NEO's economy for the period of time from 2004 to 2009 with special highlights on the changes in the years from 2004 to 2009 and 2008 to 2009.
- The report consists of two major parts. The first part includes an analysis of employment and wages. The second part highlights findings from the analysis of gross domestic product (GDP) and productivity.

# Methodology Note

- This study uses a definition of high-tech industries established by Daniel Hecker in “High-technology employment: a NAICS-based update” published in *Monthly Labor Review*, pp.57-72, July 2005. Our definition takes into account the changes in North American Industry Classification System (NAICS) and includes 44 industries with unique 4-digit NAICS codes.
- The NEO region encompasses 21 counties (Appendix 1). The remainder of Ohio is defined as Ohio less NEO. The remainder of the Midwest is defined as an aggregation of five Midwest states other than Ohio: Illinois, Indiana, Michigan, Minnesota, and Wisconsin.
- The first part of the analysis is based on the data drawn from the Quarterly Census of Employment and Wages (QCEW). The second part of the analysis uses Moody’s Economy.com database. Throughout the analysis, we emphasize NEO industries with a higher than the average in the U.S. concentration of employment and GDP (also called economic base industries or export industries).
- Additional technical note on data is included in Appendix 2.

# Analysis of Employment and Wages

## Table 1. Employment in All Industries and High-Tech Industries in NEO and the U.S., 2004-2009

	2004	2005	2006	2007	2008	2009
<b>U.S. all industries</b>	126,730,069	128,889,163	131,534,435	133,311,681	134,097,038	129,107,064
<b>U.S. high-tech</b>	12,057,007	12,239,453	12,527,484	12,802,735	13,114,147	12,991,032
<b>NEO all industries</b>	2,003,754	2,011,749	2,015,648	2,000,223	1,984,188	1,885,620
<b>NEO high-tech</b>	169,608	169,367	171,255	172,220	175,842	168,250

Source: Quarterly Census of Employment and Wages

- NEO employment in high-tech industries grew by 3.8%, between 2005 and 2008 reaching its highest point in 2008; employment in high-tech industries declined by 4.3% between 2008 and 2009 (Table 1).
  - One-half of employment losses in 2008-2009 occurred in four industries: Management of Companies (-1,400), Architectural and Engineering (-940), Other General Purpose Machinery Manufacturing (-800), and Management, Scientific, and Technical Consulting Services (-680).
- US employment in high-tech industries has the dynamics similar to NEO. It grew in period from 2004 to 2008 and declined in 2008 to 2009 (-1%).
- NEO's employment in all industries reached its highest point in 2006 and declined thereafter.
- U.S. total employment grew between 2004 and 2008 and declined in 2008-2009 as well.

Source: Quarterly Census of Employment and Wages

## Employment in High-Tech Industries in NEO and Benchmark Regions, 2004-2009

- Over the period studied, NEO employment in high-tech industries declined by 0.8 % as a result of the great losses in 2008-2009 (-4.3%) (Table 2).
- The remainder of Ohio performed better than NEO. Employment in high-tech industries grew 2.9% in the 5-year period from 2004 to 2009. The decline was only -1.3% in 2008-2009.
- Employment in high-tech industries in the remainder of the Midwest showed a modest growth of 0.2% for the period studied. It declined by -3.4% in the period from 2008 to 2009.
- U.S. high-tech industries performed better than the Midwest: it grew 7.7% from 2004 to 2009, even after a decline of -0.9% in 2008-2009.

# Figure 2. Share of Employment in High-Tech Industries: NEO, Remainder of Ohio, Remainder of Midwest, and the U.S., 2004-2009

Source: Quarterly Census of Employment and Wages

## **Share of Employment in High-Tech Industries: NEO, Remainder of Ohio, Remainder of Midwest, and the U.S., 2004-2009**

- Share of employment in high-tech industries in NEO has increased (8.9%) , but it is still lagging all benchmark regions (Figure 2).
- NEO's large decline of employment in high-tech industries in 2008-2009 slowed down the growing trend of previous years.
- The remainder of Ohio has a share of employment in high-tech industries similar to that of the U.S. (9.9% compared to 10.1%, respectively).

## Table 3. NEO's High-Tech Base Industries (High-Tech Industries with Employment LQ ≥ 1)

9	3333	Commercial and Service Industry Machinery Manufacturing	1,484	1,859	1.2	1.1	1.3	<b>1.0</b>	0.8	1.3	-32.1%	-39.5%	-16.5%	-13.7%	-13.8%	-8.3%	-7.5%	-7.3%

Note: The location quotient (LQ) is the calculated ratio between the local economy and the economy of some reference unit – in our case the national economy. A location quotient greater than one suggests that there is a concentration of an industry in the region, while a location quotient less than one suggests an industry is not concentrated in the region. The concentration of an industry in the region suggests that the industry is a part of the economic base of the region and that the industry is an exporter.

This table is ranked by NEO High-Tech Employment LQ, 2009. One industry with LQ>1 is suppressed (Appendix 2).

Source: Quarterly Census of Employment and Wages

## **NEO's High-Tech Base Industries (High-Tech Industries with Employment LQ $\geq 1$ )**

- Ten high-tech industries in NEO have a location quotient greater than 1 (Table 3). These industries are likely to be export industries that sell their products outside of the region. One industry in Table 3 is not included due to the suppression of data.
- All ten industries lost employment in 2008-2009 in NEO, except Electric Equipment Manufacturing (NAICS 3353).
- Eight of the ten high-tech base industries in NEO are manufacturing.
- Eight of the ten industries (including one that is suppressed) high-tech base industries in NEO increased their LQ from 2004 to 2009.

## NEO's High-Tech Base Industries in Benchmark Regions

- All NEO high-tech base industries in the remainder of Ohio lost employment over the study period and decreased their location quotients (Table 3).
- Of these industries in the remainder of the Midwest, two industries performed well:
  - Resin, Synthetic Rubber, and Artificial Synthetic Fiber (NAICS 3252)
  - Basic Chemical Manufacturing (NAICS 3251)
- However, these two industries are not part of the remainder of the Midwest economic base (LQ=1).

Note: This table is ranked by 2009 employment LQ for the Remainder of Ohio.

Source: Quarterly Census of Employment and Wages

## Remainder of Ohio's High-Tech Base Industries (High-Tech Industries with Employment LQ > 1)

- Most of the high-tech base industries in the remainder of Ohio increased their employment LQ from 2004 to 2009 (Table 4).
- Out of 16 high-tech base industries:
  - Six industries grew in the period from 2004 to 2009, including the last year
  - Another two industries grew between 2004 and 2009 even though they declined in 2008-2009
  - Three industries (with LQ=1) increased employment in the period from 2004 to 2009 and may become a part of the emerging remainder of Ohio's high-tech base:
    - NAICS 3364 – Aerospace Product and Parts Manufacturing
    - NAICS 2211 – Electric Power Generation
    - NAICS 3241 – Petroleum and Coal Products Manufacturing

## Growing High-Tech Industries in NEO: 2004-2009

- Out of 42 NEO high-tech industries, 19 increased their employment between 2004 and 2009 (4 industries are omitted in the Table 5 due to data suppression). Of these 19 industries, 7 industries continued to grow from 2008 to 2009 (Table 5).
- Employment gains in the growing industries totaled more than 7,000 jobs.
- Only two growing NEO high-tech industries are a part of NEO's economic base (have  $LQ > 1$ ): Electrical Equipment Manufacturing (NAICS 3353) and Monetary Authorities-Central Bank (NAICS 5211) (data on this industry are suppressed).
- Scientific Research and Development Services industries (NAICS 5417) showed the second highest growth of high-tech industries studied; however, only about half of its growth can be attributed to an increase in R&D operation (the other half is due to changes in data reporting by several large companies in this sector).

## **Growing High-Tech Industries in NEO: 2008-2009**

- A total of ten high-tech industries added employment in the period from 2008 to 2009. However, four of ten industries had fewer than 500 employees each and these industries are not included in Table 6 (the data for these industries are suppressed).
- Pharmaceutical (NAICS 3254) had the highest rate of growth in NEO in the period from 2004 to 2009 (40.4%). It also had the highest rate of growth from 2008 to 2009 (4.8%), adding 68 employees.

## **Average Wages in High-Tech: NEO, Remainder of Ohio, Remainder of Midwest, and U.S., 2004-2009**

- Average annual wage (AAW) in NEO's high-tech industries was \$70,147 in 2009 (Table 7).
- NEO experienced the highest growth of AAW from 2004 to 2009 (8.3%) compared to all benchmark regions.
  - AAW in NEO's non high-tech industries was almost flat, growing by only 0.1%
- AAW in NEO's high-tech industries are still significantly lower than in the benchmark areas.
- All regions showed declining AAW in the period from 2008 to 2009.
- NEO lost only 1.1% in AAW during 2008 to 2009, while the benchmark regions lost about 3 times more.

## **GDP for NEO and Benchmark Regions, 2004-2009**

- NEO high-tech sector accounts for 34.7% of Ohio's high-tech GDP in 2009 (Table 8).
- NEO high-tech industries account for 15.9% of total NEO GDP.
- NEO high-tech sector's GDP grew while the GDP for the rest of the regional economy declined.
- NEO high-tech GDP grew by 12% between 2004 and 2009, faster than the remainder of the Midwest (10.3%), but lagging the remainder of Ohio (16%) and the U.S. (14.8%).

# Figure 4. Share of High-Tech GDP in Total GDP: NEO, Remainder of Ohio, Remainder of Midwest, and the U.S., 2004-2009

Note: All data are inflated to 2009 dollars.  
 Source: Moody's Economy.com

## Share of High-Tech GDP in Total GDP: NEO, Remainder of Ohio, Remainder of Midwest, and U.S., 2004-2009

- Although the GDP of NEO's high-tech sector is growing, the region's share of high-tech in total GDP (15.9%) still lags the benchmark regions (Figure 4).
- The remainder of Ohio and the remainder of the Midwest increased their high-tech GDP shares between 2008 and 2009, while the shares in NEO and US declined slightly.

## NEO High-Tech Base Industries (High-Tech Industries with GDP LQ $\geq 1$ )

- 14 out of 42 high-tech NEO industries are part of NEO economic base (GDP LQ $\geq 1$ ) (Table 9).
- 10 of these 14 industries are manufacturing.
- Moreover, 4 high-tech manufacturing industries produce GDP in NEO at least twice more than these industries in the U.S., on average. (The 2009 GDP LQ of these industries exceeds 2):
  - NAICS 3255 – Paint, Coating, and Adhesive Manufacturing
  - NAICS 3353 – Electric Equipment Manufacturing
  - NAICS 3339 – Other General Machinery Manufacturing
  - NAICS 3369 – Other Transportation Equipment Manufacturing
- GDP grew in 2004-2009 in two large manufacturing industries that are part of the regional economic base: Electric Equipment Manufacturing (NAICS 3353) with LQ=3.5 and Other General Machinery Manufacturing (NAICS 3339) with LQ=2.8. GDP growth over this period absorbs a decline between 2008 and 2009.
- GDP grew in one additional manufacturing industry in 2004 to 2009: Navigational, Measuring, Electromedical, and Control Instruments Manufacturing (NAICS 3345, LQ=1).

Source: Moody's Economy.com

## Productivity in NEO and Benchmark Regions, 2004-2009

- NEO high-tech productivity is similar to that of the remainder of Ohio, but about \$10,000 per employee lower than the productivity in the remainder of the Midwest and about \$30,000 lower than the productivity in the U.S (Table 10, Figure 5).
- The productivity gap between NEO and benchmark areas remained the same during the period from 2004 to 2009.
- In 2004 to 2009, productivity in NEO's high-tech sector grew 17.7%, including 7.1% growth in the period from 2008 to 2009. This was the highest long-term growth rate of all benchmark areas.
- In 2008 to 2009, productivity in NEO grew slightly faster than in the remainder of Ohio and the U.S. Productivity in the remainder of the Midwest grew at the fastest rate (7.7%).
- Growth of productivity in NEO was accompanied by large employment losses.

## Figure 5. Productivity of High-Tech in NEO and Benchmark Regions, 2004-2009

Note: All data are inflated to 2009 dollars.

## Figure 6. Productivity Gap in NEO: High-Tech vs. Non-High-Tech

Note: All data are inflated to 2009 dollars.

Source: Moody's Economy.com

## Productivity Gap in NEO: High-Tech vs. Non-High-Tech

- Productivity in NEO's high-tech industries is significantly higher than that of the non-high-tech sector (Figure 6).
- The productivity gap between high-tech and non-high-tech sector is growing over time:
  - From \$43,919 in 2004 to \$63,323 in 2009.

# Table 11. Productivity Growth in NEO's High-Tech Industries: 2004-2009 (In Thousands of 2009 Dollars)

## **Productivity Growth in NEO's High-Tech Industries: 2004-2009**

- 31 high-tech industries had higher productivity in 2009 than in 2004 (Six industries are suppressed in Table 11).
- 17 industries in NEO, each with employment over 1,000, experienced a double-digit growth in productivity.

## **Productivity Growth in NEO's High-Tech Industries: 2008-2009 (In Thousands of 2009 Dollars)**

- At least 10 large industries with employment above 1,000 each, experienced a double-digit growth in productivity in 2008-2009 (Table 12).
- 11 more large industries grew their productivity by at least 2% in 2008-2009.
- Growth of NEO productivity in 2008-2009 was also accompanied by large employment losses.

## **Appendix 1: NEO region includes 21 OH counties**

- Ashland
- Ashtabula
- Carroll
- Columbiana
- Crawford
- Cuyahoga
- Erie
- Geauga
- Holmes
- Huron
- Lake
- Lorain
- Mahoning
- Medina
- Portage
- Richland
- Stark
- Summit
- Trumbull
- Tuscarawas
- Wayne

## Appendix 2: Technical Note

- Some of the data in our analysis are suppressed. Federal and state regulations prohibit publishing data in a way that might make individual businesses identifiable. This leads to two types of data suppression. When a few businesses account for a high proportion of industry employment in an area or when industry employment in an area is low, data about that industry in the area are suppressed (primary suppression). Primary data suppression alone may not protect a business' identity. Data for the same industry in another county may be suppressed so that county totals will not equal the totals of higher levels units (secondary suppression).
