Boundaries That Matter: Redistricting Congressional Election Districts

Presented to the First Unitarian Church of Cleveland

February 26, 2017

Mark Salling, PhD, GISP
Senior Fellow
Maxine Goodman Levin College of Urban Affairs
Cleveland State University

The Importance of Election Boundaries

When the Lines are Drawn with One Party in Control

http://bit.ly/reagan-on-redistricting

Congressional Redistricting in Ohio

Who Decides?

In Ohio – the state legislature– every 10 years after the census

- ➤ Population of each district must be as close to the average in each state as "reasonably possible". (therefore equal populations within a state)
- ➤ Voting Rights Act of 1965 minority representation

> There are no other requirements.

But there are other possible considerations

Compactness

Communities of Interest. e.g., keep whole counties or municipalities together

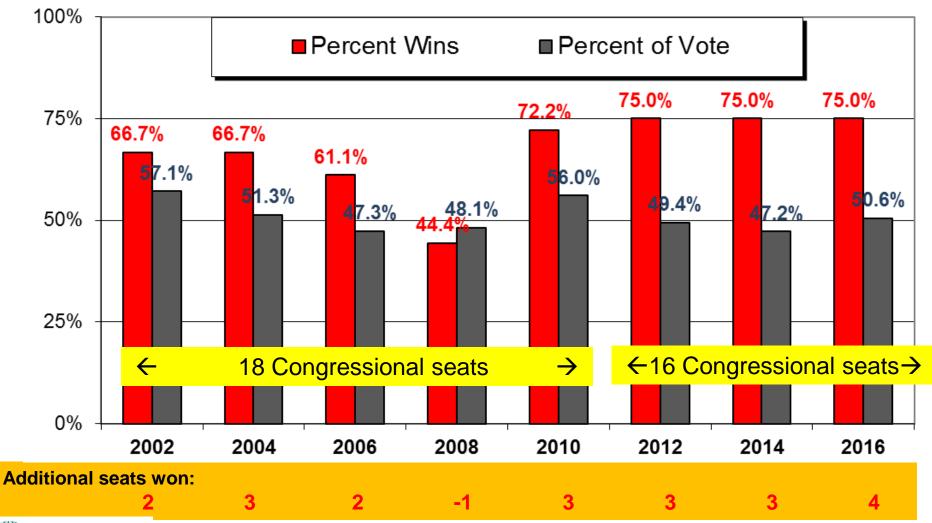

<u>Competitiveness</u>. Maximize the number of legislative districts that could be won by either party.

<u>Representational Fairness</u>. Minimize the difference between proportions of votes for the political parties and the legislative seats won by those parties.

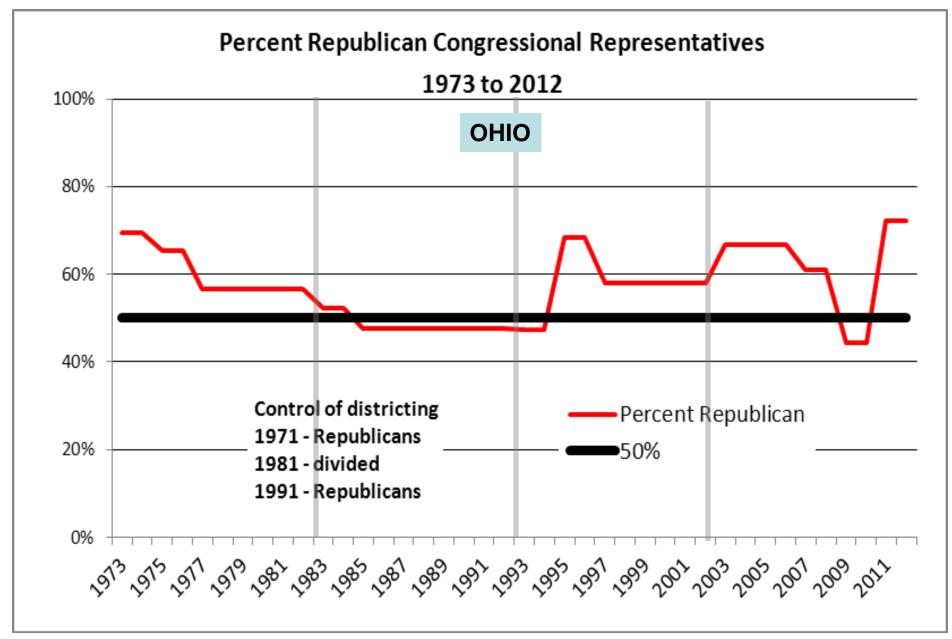

Representational Fairness

Congressional Wins and Percentage of Vote for the Controlling Party in Ohio, 2002 - 2016

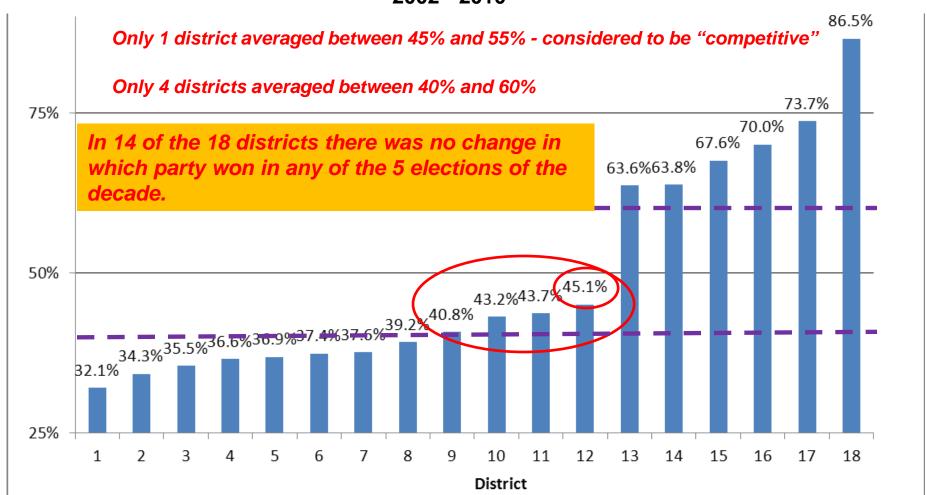

Competiveness

Percentage of Votes for Congressional Candidates for Party Not in Control of Redistricting 2002 - 2010

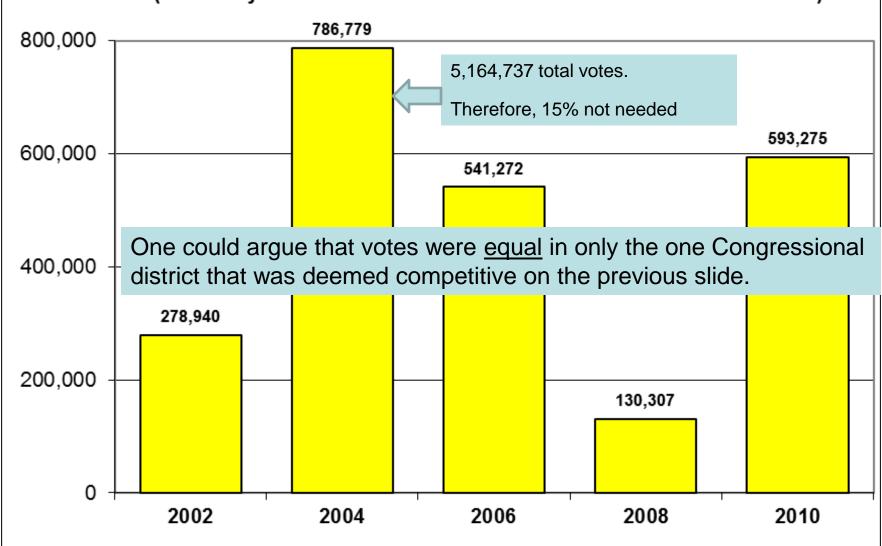

Within states, when boundaries don't reflect the preferences of the electorate,

votes don't count the same.

Wasted Votes by Party Not in Control of Redistricting Ohio Congressional Elections, 2002-2010

(votes beyond those needed to attain the number of elections won)

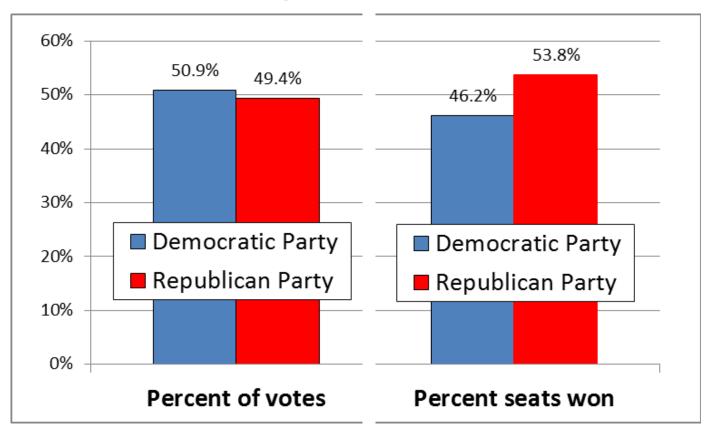

National Picture

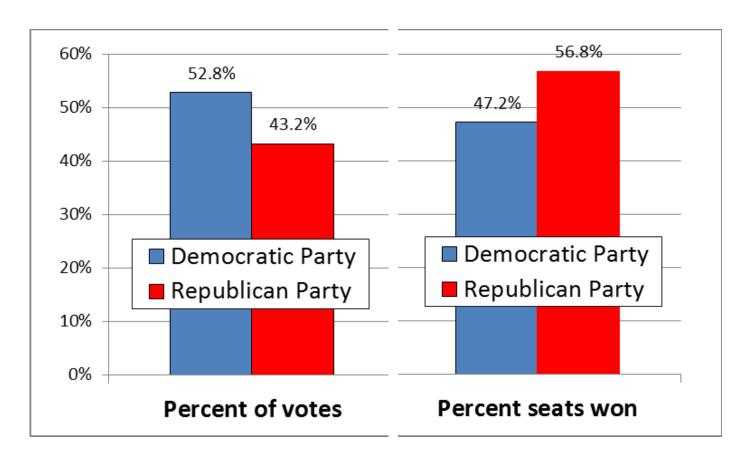

National Congressional Fairness, 2012

20 seats won by Republicans more than their share of votes would indicate.

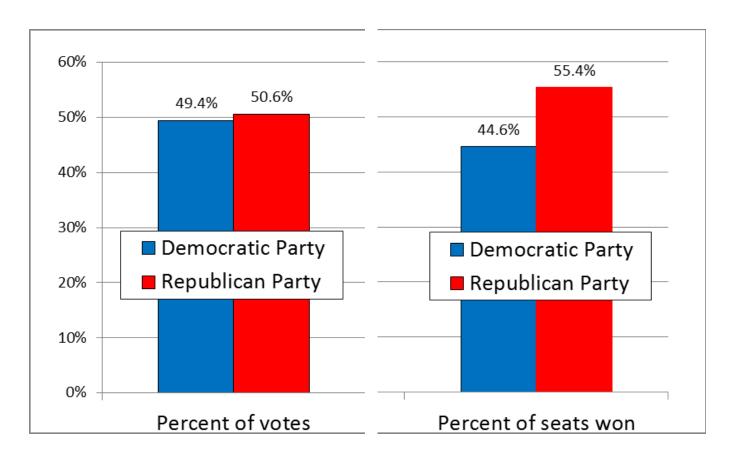

National Congressional Fairness, 2014

17 seats won by Republicans more than their share of votes would indicate.

National Congressional Fairness, 2016

21 seats won by Republicans more than their share of votes would indicate.

END
